

Sumiglass®

Technical Information

Glass Thickness

Thickness custom produced to specified size, from a nominal 1/4" (6 mm) up to a nominal 1" (24 mm) thick.

Glass Types and Shapes

Types of glass used: Any clear, tinted or coated glass is a candidate for the Sumiglass process, as long as the glass has one smooth surface appropriate for lamination, including 3/32" to 1/2" thick. Tempered or heat strengthened glass can be laminated upon request. Shapes include squares, rectangles, circles, triangles, trapezoids, or glass cut to a specific pattern.

Customer Service

Technical service assistance is available, including price quotes, fabrication options, glass selection, interlayer samples, information on product availability and on lead times. Arch Deco Glass® is a full-service glass fabricator. For assistance, please contact, toll free (U.S.) 1-800-870-2519; Fax: 1-800-558-DECO (3326)
